TECHNOLOGY

Non Thermal Plasma Technology for indoor air decontamination, to protect our health and improve environmental comfort. It reduces and eliminates virus, bacteria and volatile organic compounds, generated in environments and coming from outside.

Jonix CUBE has been designed for the sanitization of rooms up to 85 square meters.

Follow the indications in the table to set the correct operating level, according to the surface of the room.

Floor area		Daily recommended minimum operating time *
10 m ²		3 h
20 m ²		3 h
30 m ²		4 h
40 m ²		8 h
50 m ²		12 h
60 m ²		24 h
70 m ²		24 h

* Operating times can be modified according to specific needs.

Jonix CUBE is made within a production chain that links Jonix to a social project for disabled people. (SOL.Co)

Air purification devices

jonixair.com | support@jonixair.com

Jonix CUBE is an air purification device; design and advanced technology of cold plasma to remove bacteria, molds, viruses, pollutants and odors. Air pollution has a direct effect on our body's vital functions and our ability to stay healthy.

CUBE creates ideal conditions for the body, giving people an improvement in their state of health: brings relief from breathing difficulty symptoms to allergic and asthmatic people, optimizes respiratory functions in asthmatics, improves vital functions and increases oxygen absorption by the body.

CUBE protects against microbial contamination aerial carried in all areas with high transit of persons and in crowded rooms.

DESIGN AND RELIABILITY

We took care of the design and details. Produced entirely in Italy, accurate workmanship, and quality of the Italian industry. Jonix CUBE is the only air purification device in line with protocols:

YOUR CUBE

Jonix CUBE is available in two basic colors: black and white but thanks to the collaborations with skilled Italian craftsmen it is possible to have customized finishes, ask us for more information.

USE AND MAINTENANCE

Jonix CUBE is a device that eliminates odors, bacteria, viruses and volatile organic compounds from the air. You will always have the sensation of breathing fresh and clean air. It promotes your relaxation and good sleep quality. Jonix CUBE requires little maintenance (follow the instructions on our YouTube channel) and its energy consumption is 10 watt/h.
